WEEKLY STATUS REPORT
Week of 28 May to 1 June 1984

I. Major Activities During the Past Week

A. Support to OL:

STAT CONIF (Contract Information System). A meeting was held with
STAT representatives from OL OF, and ODP on Tuesday, 29 May, to
STAT discuss changes which must be made to the CONIF database before
implementation of the funded 88 GAS enhancement. There are many
more modifications to CONIF than were originally anticipated as
we have already found four different procedures that are greatly
affected. [redacted] have been working
on these changes, and it has been determined that the work and
testing of the procedures will not be complete until the end of
June. User testing will require another month, so the adjusted
target date for implementation is now 1 August. [redacted] (U)

STAT FARS (Federal Automated Requisitioning System). Retirement
of Suspense records to the History file has finished. Compression
will begin next week. [redacted] (U)
